SUMMARY

I'm passionate in understanding the learning principles governing human intelligence and believe that human learning is completely unsupervised. That's why, most of my research focuses on unsupervised learning.

During my doctoral studies, I've focused on analyzing how to exploit unlabeled data in machine learning, providing answers to the following research questions: (i) Is it possible to learn in the context of limited data, (ii) to scale existing algorithms for positive-unlabeled learning, (iii) to convert the traditional mini-max game of generative adversarial networks into a single minimization problem?

Besides research, I like the sports world, especially skiing. From 2007, I've been the coach of different local racing ski teams and hold several ski instructor courses. In 2011, I've obtained the diploma of ski master instructor, namely the highest professional Italian degree in alpine skiing. Before that, I've participated as an athlete to many international competitions.

INTERESTS

VOLUNTEERING	From 2012 to 2014, I've participated to a no-profit association, GiPro , composed by young representatives of different sectors (e.g. ski instructors, engineers, lawyers, psychologists). The goal of the association is to promote the professional categories on the territory and stimulate the inter-professional collaboration of young people.
OTHERS	I like playing soccer.
